(d) Use the polar equation found in (c) to set up and evaluate an integral expression with respect to the polar angle θ that gives the area of S .

17. (Calculator Permitted) A curve is drawn in the xy -plane and is described by the equation in polar coordinates $r = \theta + \cos(3\theta)$ for $\frac{\pi}{2} \leq \theta \leq \frac{3\pi}{2}$, where r is measured in meters and θ is measured in radians.
